
Groups fixed before the results. learned: mean of visits 13-16 >= 3 and visit 1 <= 2. lost: accepted >= 1 in at least one of visits 1-8 and accepted == 0 in all of visits 9-16. never: accepted == 0 in all 16 visits. Precedence: never, then learned, then lost, then stable (the first matching rule wins). S/RL = accepted/attempts.
